Task Analysis – Ice Cream Ordering Application

Task Analysis

Task Analysis is the process of breaking down how users interact with an **Ice Cream Ordering Application** into smaller and manageable steps. It helps to understand how users open the app, create an account or log in, browse ice cream items, select flavors, add them to the cart, make payments, and complete their order.

This analysis helps identify user needs, improve system performance, and ensure a smooth and enjoyable ordering experience.

Key Aspects of Task Analysis

- Understanding what tasks users perform (opening the app, browsing ice creams, selecting items, payment).
- Identifying the sequence of actions required to place an order.
- Analyzing user difficulties such as login issues, payment failures, or unavailable items.
- Defining system requirements to improve user experience and ordering speed.
- Ensuring efficient ordering, payment processing, and delivery confirmation.

User Flow

User Flow is a visual representation of how users navigate through the **Ice Cream Ordering Application** to successfully browse, select, and purchase ice cream. It shows each step from opening the app to completing the order.

User Flow for Ice Cream Ordering Application

Start → Open App → Welcome Screen → Login / Sign Up → Home Page → Browse Ice Cream Menu → Select Ice Cream → Add to Cart → Continue Shopping? → Checkout → Select Payment Method → Payment Confirmation → Order Successful → Thank You Page → End

User Flow – Step by Step

Step 1: Start

- The user decides to order ice cream using the mobile application.
- The process begins when the user opens the app.

Step 2: Open App

- The application launches and displays the **welcome screen**.
- The user sees an introduction screen with ice cream images and a **Get Started** button.

Step 3: Login / Sign Up

- The user can choose one of the following options:
 - Continue with Google
 - Continue with Phone Number
 - Login with existing account
- New users create an account, while existing users log in.

Step 4: Sign In

- The user enters **Gmail and password**.
- The system verifies login details.
- If correct, the user proceeds to the home screen.

Step 5: Home Page

- The home screen displays:
 - Search bar
 - Ice cream promotions
 - Categories (Cones, Cups, Scoops)
 - New items and special offers
- The user can browse different ice cream products.

Step 6: Browse Ice Cream Menu

- The user explores different ice cream options available in the app.
- Items are displayed with images and prices.

Step 7: Select Ice Cream

- The user selects an ice cream product they want to purchase.
- The product page displays:
 - Ice cream image
 - Price
 - Buy option

Step 8: Add to Cart

- The user clicks the **Buy** button.
- The selected ice cream is added to the cart.

Step 9: Continue Shopping? (Decision Step)

Decision:

- Yes → The user returns to the menu to browse more ice creams.
- No → The user proceeds to checkout.

Step 10: Checkout

- The user reviews the selected items before payment.
- The system displays the total price.

Step 11: Select Payment Method

- The user selects a payment method.

Payment options include:

- Google Pay
- Phone Pe
- Other Payment Methods
- Cash on Delivery

Step 12: Payment Confirmation

- The system processes the payment.

Decision:

- If payment fails → The user retries payment.
- If payment succeeds → The order is confirmed.

Step 13: Order Confirmation

- The system displays a confirmation message indicating successful payment.
- The order is processed.

Step 14: Thank You Page

- The application displays a **Thank You message**.
- The user receives confirmation of the completed order.

Step 15: End of Process

- The ordering process is completed successfully.
- The user can place another order anytime using the application.
